**Bachelor of Computer Applications**  
**Semester IV (CBCS)**  
**Syllabus**  
**(Effective from June 2018)**

# GUJARAT UNIVERSITY

## BCA SEMESTER IV SYLLABUS

COURSE TITLE	Database Management System - II			
COURSE CODE	CC-208			
COURSE CREDIT	3			
Session Per Week	4			
Total Teaching Hours	40 HOURS			
AIM				
The aim of the course is to make student how to use these concepts in database applications.				
LEARNING OUTCOMES				
Students would be able to:				
1) Decide where and how to store and retrieve the information effectively using advanced concept of database				
2) Recognize the elements of Database for real life applications.				
3) Familiar with the advanced database concepts such as distributed database, business intelligence and data warehouse etc.				
DETAIL SYLLABUS				
UNIT	TOPIC / SUB TOPIC	TEACHING HOURS		
1	<p><b>Introduction to SQL</b></p> <ul style="list-style-type: none"><li>● Introduction to SQL</li><li>● Data Definition Commands<ul style="list-style-type: none"><li>○ Data Types</li><li>○ Creating Table Structures</li><li>○ SQL Constraints</li></ul></li><li>● Data Manipulation Commands<ul style="list-style-type: none"><li>○ Adding Table Rows</li><li>○ Saving Table Changes</li><li>○ Listing Table Rows</li><li>○ Updating Table Rows</li><li>○ Restoring Table Contents</li><li>○ Deleting Table Row</li></ul></li><li>● Select Query<ul style="list-style-type: none"><li>○ With Conditional Restrictions</li><li>○ Arithmetic Operators</li><li>○ Logical Operators</li><li>○ Special Operators</li></ul></li><li>● Advanced Data Definition Commands<ul style="list-style-type: none"><li>○ Changing a Column's Data Type</li><li>○ Changing a Column's Data Characteristic</li><li>○ Adding a column</li><li>○ Dropping a column</li><li>○ Advanced Data Update</li><li>○ Copying Parts of Table</li><li>○ Adding Primary and Foreign Key Designations</li><li>○ Deleting Table From The Database</li></ul></li></ul>	<p>10</p> <p>5</p> <p>5</p>		

**TEXT BOOK/S:**

**Database System Concepts (First Edition: 2008)**

Publisher: Cengage Learning

By Peter Rob and Carlos Coronel

**Chapter-10 (10.1, 10.2, 10.3, 10.4, 10.5, 10.6)**

**Chapter-12 (12.1, 12.3, 12.6, 12.7, 12.8, 12.9, and 12.10)**

**Chapter-7 (7.1, 7.2 (7.2.4, 7.2.5, 7.2.6, 7.2.7) 7.3, 7.4, 7.5, 7.6.3) Excluding (7.1.1, 7.1.2, 7.2.3)**

**Chapter-8 (8.1, 8.2, 8.3, 8.4, 8.5)**

## **REFERENCE BOOKS:**

1. Introduction to Database Management Systems (First Edition 2006)

Publisher: Tata McGraw-Hill

By ISRD Group

2. An Introduction to Database Systems (Eighth Edition 2006)

Publisher : Pearson

By C. J. Date, A. Kannan & S. Swamynathan

3. An Introduction to Database Systems

Publisher: Pearson

By ITL Education Solutions Limited

## BCA SEM-IV SYLLABUS

<b>COURSE TITLE</b>	<b>System Analysis, QA and Testing</b>	
<b>COURSE CODE</b>	<b>CC-209</b>	
<b>COURSE CREDIT</b>	<b>3</b>	
<b>Session Per Week</b>	<b>3</b>	
<b>Total Teaching Hours</b>	<b>40 HOURS</b>	
<b>AIM</b>		
To develop the skill about System Analysis, Quality Assurance and types of Testing Methods To make the students able to design CD, DFD, UML Diagrams and test the existing systems.		
<b>LEARNING OUTCOMES</b>		
On the completion of the course students will: 1.Understand different models and draw data flow diagrams 3.Understand the basic android terminology and technology 4.Learn how to draw uml diagrams 5.To understand the basic terminologies and types of testing		
<b>DETAIL SYLLABUS</b>		
UNIT	TOPIC / SUB TOPIC	TEACHING HOURS
1	<b>SYSTEM ANALYSIS AND DESIGN</b>	<b>10</b>
	Software Development Models <ul style="list-style-type: none"><li>o Waterfall Model</li><li>o The Incremental Model</li><li>o The Spiral Model</li></ul>	4
1	Requirement Modeling / Fact-finding techniques <ul style="list-style-type: none"><li>Interview</li><li>Document review</li><li>Observation</li><li>Questionnaires and surveys</li><li>Overview Feasibility Study</li><li>Operational , Technical , Economic , Schedule Feasibility</li><li>Data Flow Diagram: Concepts, Symbols, Rules, Construction of CD and DFD</li></ul>	6

	<b>Object Oriented Analysis</b>	<b>10</b>
2	The Constituents of OOAD: o Objects and Classes o Links and Association o Generalization and Specialization o Aggregation and Composition o Coupling and Cohesion o Components o Interfaces	4
	<b>UML DIAGRAMS</b> Use-Case Diagram: Benefits of Use-Case Diagram o Actors, Use-Cases , Relationship between Actor and Use Case Sequence Diagram: Elements of Sequence Diagram: Life Lines, Messages, Activation, Guards, Combined Fragments, Objects	6
3	<b>UML DIAGRAMS</b> Activity Diagram: Elements of Activity Diagram: Initial State, Final State Action / Activity Transitions , Decision Synchronization, Fork and Join Swim lanes, Object and Object Flow Class Diagram: o Elements of Class Diagram:	10
	User Interfaces and Layouts o Viewgroups o Built-in Layout classes o FrameLayout, LinearLayout, RelativeLayout,TableLayout, GridLayout o Multiple Layouts on a screen	6
4	<b>QA and TESTING</b> Quality, Quality Assurance and Quality Control White Box Testing Black Box Testing Integration Testing	4
	<b>QA and TESTING</b> System and Acceptance Testing Performance Testing Regression Testing Test Metrics and Measurements	10

## **BCA IV SYLLABUS**

<b>COURSE TITLE</b>	<b>CORE JAVA</b>					
<b>COURSE CODE</b>	<b>CC-210</b>					
<b>COURSE CREDIT</b>	<b>3</b>					
<b>Session Per Week</b>	<b>4</b>					
<b>Total Teaching Hours</b>	<b>40 HOURS</b>					
<b>AIM</b>						
To develop the skill about the basic knowledge of java programming language with oop concepts and provide knowledge about platform independent concept.						
To provide knowledge of interface exception handling,threading, package and applet details through java.						
<b>LEARNING OUTCOMES</b>						
On the completion of the course students will:						
1.Understand the java programming and oop concepts.						
2.Understand the concepts of Inteface, exception handling, threading, and package.						
3.Understand the basic concepts of applet.						
<b>DETAIL SYLLABUS</b>						
UNIT	TOPIC / SUB TOPIC	TEACHING HOURS				
1	Java Introduction <ul style="list-style-type: none"> <li>• Principles of Object oriented language</li> <li>• Java Essentials</li> <li>• Java Virtual Machine</li> <li>• Java Features</li> <li>• Program Structure</li> <li>• Java Improvements</li> <li>• Difference between Java and C++</li> <li>• Installation of JDK 1.7</li> <li>• Integrated Development Ebvironment</li> </ul>	10	3			
	<ul style="list-style-type: none"> <li>• Java Programming constructs               <ul style="list-style-type: none"> <li>o Variables</li> <li>o Primitive Data Types</li> <li>o Identifier</li> <li>o Literals</li> <li>o Operators</li> <li>o Expressions</li> <li>o Precedence Rules and Associativity</li> <li>o Primitive type conversion and casting</li> <li>o Flow of Control</li> </ul> </li> </ul>		4			

	<ul style="list-style-type: none"> <li>• Classes and Objects           <ul style="list-style-type: none"> <li>◦ Class, Objects, Class declaration in java, Creating Objects</li> <li>◦ Methods, Constructors, Cleaning Up Unused Objects</li> </ul> </li> </ul>	3
2	<b>Array, Inheritance and Interface</b> <ul style="list-style-type: none"> <li>◦ Class Variable and Methods - Static Keyword</li> <li>◦ this keyword</li> <li>• Arrays</li> <li>◦ One dimensional, Two dimensional</li> <li>◦ Using For..each with array</li> <li>◦ Passing arrays to methods and returning arrays from method</li> <li>• command line arguments</li> </ul>	4
	<ul style="list-style-type: none"> <li>• <b>Inheritance</b> <ul style="list-style-type: none"> <li>◦ Deriving classes using extends keyword</li> <li>◦ Overriding Method</li> <li>◦ super keyword, final keyword</li> <li>◦ Abstract class</li> </ul> </li> <li>• <b>Interface</b> <ul style="list-style-type: none"> <li>◦ Variables in Interface</li> <li>◦ Extending Interfaces</li> <li>◦ Interface vs Abstract class</li> </ul> </li> </ul>	4

## BCA IV SYLLABUS

<b>COURSE TITLE</b>	<b>E-COMMERCE</b>
<b>COURSE CODE</b>	<b>CC-211</b>
<b>COURSE CREDIT</b>	<b>3</b>
<b>Session Per Week</b>	<b>4</b>
<b>Total Teaching Hours</b>	<b>40 HOURS</b>

### AIM

To develop the skill about the basic and important terminology of Internet.  
To make the students able for web site design fundamentals using HTML scripting.

### LEARNING OUTCOMES

On the completion of the course students will:

- 1.Understand the meaning and syntax of different tags of HTML5
- 2.Learn the basic differences between HTML and HTML5
- 3.Understand the basic internet terminology and technology
- 4.To design web pages using simple and advanced tags of HTML5.
- 5.To understand the fundamental concept of Google AdSense and Analytics.

### DETAIL SYLLABUS

UNIT	TOPIC / SUB TOPIC	TEACHING HOURS
1	Introduction to E-Commerce <ul style="list-style-type: none"><li>• E-Commerce: The revolution is just beginning</li><li>o What is E-Commerce?</li><li>o The difference between E- Commerce and E-Business</li><li>o Eight Unique Features of E-Commerce Technology</li><li>o Introduction to Web 2.0</li><li>o Types of E-Commerce</li></ul>	10 3
	<b>The Internet and World Wide Web : E-Commerce Infrastructure</b>	

	<ul style="list-style-type: none"> <li>• <b>The Internet: Technology Background</b> <ul style="list-style-type: none"> <li>o The Evolution of the Internet 1961 – the Present</li> <li>o The Internet : Key Technology Concepts</li> <li>o Other Internet Protocols and Utility Programs</li> </ul> </li> <li>• <b>The Internet Today</b> <ul style="list-style-type: none"> <li>o The Internet Backbone</li> <li>o Internet Exchange Points</li> <li>o Campus Area Networks (CANs)</li> <li>o Internet Service Providers</li> <li>o Internets and Extranets</li> </ul> </li> <li>• <b>Introduction to Internet 2</b></li> <li>• <b>The Internet and the Web: Features</b> <ul style="list-style-type: none"> <li>o E-mail</li> <li>o Instant Messaging</li> <li>o Search Engines</li> <li>o Intelligent Agents (Bots)</li> <li>o Online Forums and Chat</li> <li>o Streaming Media</li> <li>o Cookies</li> </ul> </li> </ul>	7
2	<p><b>Online Security and Payment System</b></p> <ul style="list-style-type: none"> <li>• <b>The E-Commerce Security Environment</b> <ul style="list-style-type: none"> <li>o Scope of the problem</li> <li>o What is good E-commerce security?</li> <li>o Dimensions of E-commerce security</li> <li>o The tensions between security and other values</li> </ul> </li> <li>• <b>Security Threats in the E-Commerce Environment</b> <ul style="list-style-type: none"> <li>o Malicious code</li> <li>o Unwanted programs</li> <li>o Phishing and Identity theft</li> <li>o Hacking and Cyber vandalism</li> <li>o Credit Card Fraud/Theft</li> <li>o Spoofing and Spam Web Sites</li> <li>o Sniffing</li> <li>o Insider attacks</li> <li>o Poorly designed server and client software</li> </ul> </li> <li>• <b>Technology solution</b> <ul style="list-style-type: none"> <li>o Protecting Internet communications</li> <li>o Encryption (excluding: limitation of encryption solutions)</li> </ul> </li> </ul>	<b>10</b>

**GUJARAT UNIVERSITY**  
**BCA IV SYLLABUS**

<b>COURSE TITLE</b>	<b>DATABASE MANAGEMENT SYSTEM-II PRACTICAL</b>
<b>COURSE CODE</b>	<b>CC-212</b>
<b>COURSE CREDIT</b>	<b>3</b>
<b>SESSIONS PER WEEK</b>	<b>3</b>
<b>TOTAL TEACHING HOURS</b>	<b>40 HOURS</b>

**AIM**

To develop the skill about the basic knowledge of SQL.

**LEARNING OUTCOMES**

On the completion of the course students will:

- 1.Understand the SQL concepts.

**DETAIL SYLLABUS**

<b>UNIT</b>	<b>TOPIC / SUB TOPIC</b>	<b>TEACHING HOURS</b>
1	<b>SQL</b> Create table structures. o With Different data types of SQL o with use of necessary constraints _ Primary Key _ Foreign Key _ Not Null _ Unique _ Default _ Check	<b>10</b>
	Perform following data manipulation commands on table For Example: o Adding Table Rows o Saving Table Changes o Listing Table Rows o Updating Table Rows o Restoring Table Contents o Deleting Table Row	5 hours
2	<b>SQL</b> Perform select queries on different tables. with arithmetic operators o with conditional restrictions o with logical operators o with special operators	<b>10</b>
	Apply advanced data definition commands on table For Example: o Changing a Column's Data Type o Changing a Column's Data Characteristic o Adding a column o Dropping a column o Advanced Data Update o Copying Parts of Table o Adding Primary and Foreign Key Designations o Deleting Table From The Database	8 hours

	<b>Advanced SQL</b>	<b>10 hours</b>
<b>3</b>	Perform select query with aggregate functions o Min o Max o Count o Sum o Avg	2 hours
	Apply set operators on any given two tables. o Union o Union All o Intersect o minus	2 hours
	Perform join on given two or more than two tables. o Cross Join o Natural Join o Join Using Clause o Join On Clause o Outer Join	6 hours
<b>4</b>	<b>Advanced SQL</b>	<b>10 hours</b>
	Demonstrate the use of SQL functions using SQL query on different tables. o Date and Time o Numeric o String o Conversion	3 hours
	Demonstrate the use of sub queries on different tables. o Where o In o Having o Multi rows (Any/ All) o From sub query o Attribute list o correlated	6 hours
	Create sequences and demonstrate the use of sequence.(Create, Use and Delete)	1 hours

**Following type of sample questions can be asked in the final examination**

1. CUST(CID,CNAME,CCITY,DOB)  
PROD(PID,PNAME,PCOST,PPROFIT)  
SALE\_DETAIL(CID,PID,SALE,SALE\_DATE)  
1) Write a query that display purchase detail of all customers based on sale date.  
2) Display the Name of customers who are born in 1985.  
3) Display the name of product starts with "s".  
4) Display details of product having maximum sales.

2. BRANCH\_MASTER(B\_NO,B\_NAME,LOCATION)  
CUSTOMER\_MASTER(C\_NO,C\_NAME,GENDER,DOB,CITY,CONTACT\_NO)  
ACCOUNT\_MASTER(ACC\_NO,ACC\_TYPE,B\_NO,C\_NO,OPEN\_DATE,CURR\_BALANCE)  
1) Display details of male customers only.  
2) Display the details of account opened in 1999.  
3) List all records where current balance not less than 4000.  
4) List all branch names where branch number is 1 or 3.

3. EMP(EMP\_NO,EMP\_NAME,DESIGNATION,MGR\_NO,HIREDATE,SALARY,  
COMMISSION,DEPT\_NO)  
DEPT(DEPT\_NO,DEPT\_NAME,LOCATION)  
1) List DEPTNO as DEPARTMENT NUMBER, Count of Employees as "Number of Employees"  
FROM Employee table.  
2) List all employees who earn more than the average salary of their departments.  
3) List DEPTNO, sum of salary department wise of employees who earn more than 2000.  
4) Create a view on all the employee details of deptno=10.

4. PERSON (P\_ID, LASTNAME, FIRSTNAME, ADDRESS, CITY)  
ORDER (O\_ID, ORDERNO, P\_ID, ORDER\_PRICE)  
1) List all persons in Norway and USA:  
2) Select only the records with NULL values in the "Address" column  
3) List firstname,lastname with an Order month "November".  
4) Count the no of persons having average order price=20;

5. PROGRAMMER(NAME,DOB,DOJ,PROF1,PROF2,SALARY)  
SOFTWARE(NAME,TITLE,DEV\_IN,SCOST,DCOST,SOLD)  
STUDIES (NAME,SPLACE,COURSE,CCOST)  
1) How many programmers have done the PGDCA course.  
2) Display the institute names from the Studies table without Duplicates.  
3) Display details of software having maximum scost.  
4) Display the names of the programmers whose names contain 2 Occurrences of the letter  
'A':

By C. J. Date, A. Kannan & S. Swamynathan

**REQUIRED SOFTWARE:**

## GUJARAT UNIVERSITY SYLLABUS

<b>LEARNING OUTCOMES</b>		
On the completion of the course students will: 1.Understand the language Visual Basic .NET 2.Learn the basic Visual and Windows Components / Controls. 3.Understand Object Oriented Programming with VB.NET. 4.Connectivity with Database. 5.Generating Reports with crystal reports.		
<b>DETAIL SYLLABUS</b>		
<b>UNIT</b>	<b>TOPIC / SUB TOPIC</b>	<b>TEACHING HOURS</b>
1		10
	1 Design interface and implement functionalities for Arithmetic calculator with power, square, log, factorial, square root and clear functionalities.	
	2 Design interface and implement functionalities for Loan calculator. Take Amount, No of installments and Rate of interest from the user. Also user can choose Early Pay option through a checkbox. Calculate installment amount using pmt() function. Do proper validation for inputs taken by the user.	
	3 Design an application which will have 2 radio buttons. One will convert the Celsius to Fahrenheit and another will convert Fahrenheit to Celsius. Show the appropriate output depends on the user's selection. (Use radio button to take user choice and use textbox to enter value).	
	4 Design a form having two text boxes, combo box and a label. Make the validation so that user can enter only numbers in both texboxes, if user has entered both numerical values then make the combo box visible. The combo box has options like 'ADD', 'SUB', 'MUL' and 'DIV'. According to user's choice from from combo, result will display in label.	
	5 Create an application with a textbox in which user can enter a sentence then displays 1) Number of vowels 2) Number of spaces 3) Number of digits 4) Number of special symbols When user press "analysis" button.	
	6 Design and implement a Tic Tack Toe game (Two Player).	
	7 Write a program to transfer an item from First Listbox to Second Listbox and from Second Listbox to First.	
	8 Print multiplication table into Listbox. For multiplication take value using Numeric up down.	
	9 Take 3 Radio buttons showing the name of 3 Countries. Load the image of the Flag of the country selected by the user from the given Radio buttons in the Picture box.	

	10	Take a Timer control which will delay to load MainForm by 10 seconds. Show the progress bar in the wait time. Also use Time control to scroll a label having text "Gujarat University", also take two more labels to show date and time on the tick event of the timer.	
2	1	Take 3 Scrollbars indicating values of Red, Green and Blue colors from 0 to 255. Take 3 labels to show the values of the scroll bars. Depending upon values selected by the user with the help of scrollbars make a color and shows it in the picture box. Place a button having text 'Apply Color', and on the click event of the button apply that color to the form.	10
	2	Implement Textpad application using Rich textbox. Make menus like File (New, Open Save, SaveAs and Exit), Edit (Cut, Copy, Paste, Undo, Redo), Format (Bold, Italic, Underline, Font, Color) etc. Use all common dialog controls and implement functionalities.	
	3	Take a Rich Textbox and implement Find, FindNext, Replace and ReplaceAll functionalities.	
	4	Write a program to Read and Write Text file.	
	5	Write a program to Read and Write Binary file.	
	6	Accept no from user and perform following operations using user defined sub routines or functions: 1) Factorial of number 2) Odd/even	
	7	Create MDI form. It must have File menu with option open, Close and Exit. It should also have window menu to arrange the child forms like Tile Horizontal, Tile Vertical, Cascade and Arrange Icons.	
	8	Create MDI form. It must have File menu with option Open, Close and Exit and one picture box. Allow users to open any picture using open dialog box, that picture should be displayed in the picture box.	
	9	Write function or subroutine to Find maximize, minimize value from an array and also to sort an array.	
3			10
	1	Create shape class as abstract class having area as must override function. Derive rectangle, triangle, square class based from this class.	
	2	Write a program to create class Person. Make at least three properties and one method "show detail" of this class. Now inherit class Student and Faculty from class Person and override method "show detail". Create objects of Student and Faculty class and call show detail function for both objects to show details in appropriate text boxes.	
	3	Write a program to implement the class Employee. Show Constructor Overloading.	
	4	Write a program to implement the class Book. Show Method Overloading.	
	5	Create an Invoice application in which user enters the customer name, description, unit price and quantity for the item ordered, then clicks the add item button. The application calculates the order total by multiplying the unit price by the quantity. And calculates a discount based on the order total. The user can then add another item to the order by using all information.	
	6	Create a user control called myTextBox, having all the properties of the TextBox. Add Four Properties to it called EnterClr as Color, LeaveClr as Color and MandatoryClr as Color and Mandatory as boolean. Use this control on Windows Application. Object of this control will show EnterClr when it is being focused. On Leave if Mandatory property is TRUE and Textbox is Empty then MandatoryClr has to be applied otherwise LeaveClr is applied to the Textbox.	
	7	Write an application, which works like a window's explorer, using combo box and list box. 1. The combo box should display the list of drives. 2. The list box should display the list of files and directories.	
	1	Write a Program to develop a Database Application with ADO.NET with Record Navigation and Add, Delete, Save and Update Facility for Books table (BookID, BookName, Qty, UnitPrice, TotalPrice).	10
	2	Create a login form which will validate user name and password from the database. On validation show MDI form. Show appropriate message if user name and password is incorrect.	

	3 Create two tables State(StateCode, StateName) and City(CityCode, CityName, StateCode). Design a form which will list all the state in the ComboBox. After selection of the StateName, another ComboBox should display all the Cities which belong to the state selected by the user in the first ComboBox.													
4	<p>4 Write a program to create a table Emp with the following fields:</p> <table> <thead> <tr> <th><b>Field Name</b></th> <th><b>Datatype</b></th> </tr> </thead> <tbody> <tr> <td>Eno</td> <td>Integer</td> </tr> <tr> <td>Ename</td> <td>Varchar(20)</td> </tr> <tr> <td>Salary</td> <td>Single</td> </tr> <tr> <td>Birthdate</td> <td>Date</td> </tr> <tr> <td>Designation</td> <td>Varchar(20)</td> </tr> </tbody> </table> <p>Design a form which perform Select, Insert, Update and Delete operations on the table Emp. On Insert Eno has been generated automatically.</p>	<b>Field Name</b>	<b>Datatype</b>	Eno	Integer	Ename	Varchar(20)	Salary	Single	Birthdate	Date	Designation	Varchar(20)	
<b>Field Name</b>	<b>Datatype</b>													
Eno	Integer													
Ename	Varchar(20)													
Salary	Single													
Birthdate	Date													
Designation	Varchar(20)													
	5 Create below mentioned Crystal Reports for the above application. <ul style="list-style-type: none"> <li>• List all the Employees having salary more than 25000</li> <li>• List all the Employees who are above the age 35.</li> <li>• List all the Employees designation wise.</li> </ul>													
	6 Design a following table in Access. Table name = Book (Bookcode, Booktype, Bookpublisher, Bookauthor, Bookpage, Bprice). Design Form that Display Above detail. Provide Add, Update, Delete, Next, first, last, previous functionalities. Create Crystal Report for above application.													
	7 Design a crystal report for the table given in the Q:6. Report should be Author wise and summarize it with Book count and Total of the price (Author wise).

# GUJARAT UNIVERSITY

## BCA IV SYLLABUS

<b>COURSE TITLE</b>		<b>CORE JAVA PRACTICAL</b>		
<b>COURSE CODE</b>	<b>CC-214</b>			
<b>COURSE CREDIT</b>	<b>3</b>			
<b>Session Per Week</b>	<b>3</b>			
<b>Total Teaching Hours</b>	<b>40 HOURS</b>			
<b>AIM</b>				
To develop practical skill about the basic java programming language with OOP concepts. To provide development skill of interface, exception handling, threading and applet.				
<b>LEARNING OUTCOMES</b>				
On the completion of the course practically students will: 1. Understand the java programming and Object Oriented Programming concepts. 2. Understand the concepts of Interface, Exception handling, Threading, and Package. 3. Understand the basic concepts of Applet.				
<b>DETAIL SYLLABUS</b>				
<b>UNIT</b>	<b>TOPIC / SUB TOPIC</b>	<b>TEACHING HOURS</b>		
<b>1</b>	<b>Java Introduction</b>	<b>10</b>		
1	Write a program to evaluate simple interest of a given principle, rate and time.			
2	A motor cycle dealer sells two-wheelers to his customer on loan, which is to be repaid in 5 years. The dealer charges simple interest for the whole term on the day of giving the loan itself. The total amount is then divided by 60(months) and is collected as equated monthly instalment (EMI). Write a program to calculate the EMI for a loan of Rs. X, where X is given from command line argument. Print the EMI value in rupees.			

	A car accessories shop assigns code 1 to seat covers, 2 to steering wheel covers , 3 to car lighting and 4 for air purifiers. All other items have code 5 or more. While selling the goods, a sales tax of 2% to seat covers ,3% to steering wheel covers, 4% to car lighting, 2.5% to air purifiers and 1.2% for all other items is charged. A list containing the product code and price is given for making a bill. Write a java program using switch statements to prepare a bill.
3	Write a java program to scan 3 integer values from the command line argument and display the maximum number using conditional operator.
4	Write a program to calculate the hypotenuse of right angled triangle when other sides of the triangle are given. (Hypotenuse = square root ( $x^2 + Y^2$ ))
5	Write a program to calculate the area of square and rectangle by overloading the area method.
6	Create a complex number class. The class should have a constructor and methods to add, subtract and multiply two complex numbers and to return the real and imaginary parts.
7	A shop during festival season offers a discount 10% for purchase made up to Rs.1,000, 12% for purchase value of Rs.1,000 or more up to Rs 1,500 and 15% for purchase value of Rs.1,500 or more. Write a program to implement the above scheme for a given sales and print out the sales and print out the sales value, discount and net amount payable by a customer. Create necessary methods and constructors.
8	A bank gives 6.5% per annum interest on deposits made in that bank. Write a program to calculate the total amount that a person will receive after the end of 5 years for a deposit of Rs.5000 for compound interest. Create necessary methods and constructors too.
9	Write a java program to display powers of 2 i.e. 2,4,8,16 etc up to 1024 using bitwise operators.
10	<b>2 Array, Inheritance and Interface</b>
1	Write a program to sort the elements of one dimensional array. Read value of array elements through command line argument.
2	Write a program to create an array to store 5 integer values. Also initialize the array with 5 numbers and display the array Elements in reverse order.
3	Write a program to find sum of two matrices of 3 x3.
4	Write program to create an array of company name and another array of price quoted by the company. Fetch the company name who has quoted the lowest amount.
5	Write an interface called numbers, with a method in Process(int x, int y). Write a class called Sum, in which the method Process finds the sum of two numbers and returns an int value. Write another class called Average, in which the Process method finds the average of the two numbers and returns an int.

6	<p>Create a class called NumberData that accept any array of the five numbers.</p> <p>Create a sub class called Numplay which provides methods for followings:</p> <ol style="list-style-type: none"> <li>1. Display numbers entered.</li> <li>2. Sum of the number.</li> <li>3. Average of the numbers.</li> <li>4. Maximum of the numbers.</li> <li>5. Minimum of the numbers.</li> </ol> <p>Create a class that provides menu for above methods. Give choice from the command-line argument.</p>	
7	<p>Declare an abstract class Vehicle with an abstract method named numWheels( ).provide subclasses Car and Truck that each implements this method. Create instance of these subclasses and demonstrate the use of this method</p>	
8	<p>Write an interface called Exam with a method Pass(int mark) that returns a Boolean. Write another interface called Classify with a method Division(int average) which returns a string. Write a class called Result which implements both Exam and Classify. The pass method should return true if the marks is greater than or equal to 35 else false. The division method must return "First" when the parameter average is 60 or more, "second" when average is 50 or more but below 60, "no division" when average is less than 50.</p>	
9	<p>Create class calculation with an abstract method area( ). Create Rectangle and Triangle subclasses of calculation and find area of rectangle and triangle.</p>	
10	<p>The abstract Vegetable class has four subclasses named cabbage, carrot and potato. Write an application that demonstrates how to establish this class hierarchy. Declare one instance variable of type string that indicates the color of a vegetable. Create and display instances of these object. Override the toString() method of object to return a string with the name of the vegetable and its color.</p>	
<b>3</b>	<b>Package, String and Exception Handling</b>	<b>10</b>
1	<p>Create a package P and within that package create class PackClass which have method called findmax( ) which find maximum value from three numbers. Now import the package within another class DemoClass and now display the maximum number.</p>	
2	<p>Write a program that creates three different classes in three different packages and access them from default package. All the three packages should be at the same level.</p>	
3	<p>Create package pack1 within this package create class A which contains one instance variable and one instance method. Create another package pack2 within this package create class B. where class B is calling the method and variable of class A</p>	
4	<p>Write a program that accepts a string from command line and perform following operations:</p> <ol style="list-style-type: none"> <li>1. Display each character on separate line in reverse order.</li> <li>2. Count total number of characters and display each character's position too.</li> <li>3. Identify that whether the string is palindrom or not.</li> <li>4. Count total number of uppercase and lowercase characters in it.</li> </ol>	

5	Write a Java program to input n integer numbers and display lowest and second lowest number. Also handle the different exceptions possible to be thrown during execution.	
6	Write a program that takes a string from the user and validate it. The string should be at least 5 characters and should contain at least one digit. Display an appropriate valid message.	
7	Write an application that accepts marks of three different subject from user. Marks should be between 0 to 100, if marks of any of the subject is not belong to this range, generate custom exception out of RangeException. If marks of each subjects are greater than or equal to 40 then display message "PASS" along with percentage, otherwise display message "FAIL". Also write exception handling code to catch all the possible runtime exceptions likely to be generated in the program.	
8	Write a program which takes the age of 5 persons from command line and find the average age of all persons. The program should handle exception if the argument is not correctly formatted and custom exception if the age is not between 1 to 100.	
9	Write an application that converts between meters and feet. Its first command-line argument is a number and second command line argument is either "centimeter" or "meter". If the argument equals "centimeter" displays a string reporting the equivalent number of meters. If this argument equals "meters", display a string reporting the equivalent number of centimeter. If unit is not given properly then generate custom exception Unitformatexception. If first argument is not proper format then generate numberformatexception. Generate other exception as per requirements. (1 meter=100 centimeter)	
10	Write a program that accepts 5 even numbers from command line , if any of the numbers is odd then throw custom exception OddException and count such invalid numbers.	
<b>4</b>	<b>Multithreading and Applet</b>	<b>10</b>
1	Write an application that starts two thread. First thread displays even numbers in the range specified from the command line and second thread displays odd numbers in the same range. Each thread waits for 300 milliseconds before displaying the next numbers. The application waits for both the thread to finish and then displays the message "Both threads completed".	
2	Write a program that create and starts five threads. Each thread is instantiated from the same class. It executes a loop with ten iterations. Each iteration displays the character 'x' and sleep for 500 milliseconds. The application waits for all threads to complete and then display a message 'hello'.	
3	Write a java program to create 2 threads each thread calculates the sum and average of 1 to 10 and 11 to 20 respectively. After all thread finish, main thread should print message " Task Completed". Write this program with use of runnable interface.	
4	Create two thread. One thread print 'fybca' 4 times and another thread print 'sybca' 6 times. Set priority for both thread and when thread finished print 'tybca' from main.	

5	Create an applet which draws a line, rectangle and filled circle in applet display area.
6	Write applets to draw the following shapes. a. cone b. cylinder c. cube
7	Write an applet that take 2 numbers as parameter and display their average and sum.
8	Write a Java applet that draws a circle centred in the centre of the applet. The radius of the circle should be passed as a parameter.
9	Write an applet that draw a circle divided in 6 equal parts.
10	Write an applet that draw a rectangle divided in 5 equal parts.

1. Any editor of Windows or Linux/UNIX.
2. JVM version 1.8

## **Foundation Course**

### **FC – 202(1) Scientific Computing**

#### **Course Introduction:**

The course introduces the Computer Science student to the numerical methods necessary for scientific computing such as Error, propagation, solutions of Non linear and Transcendental Equations, interpolation and Curve Fitting.

#### **Objectives:**

- 1.) To understand the concepts, techniques & applications of scientific computing.
- 2.) To develop the skills of solving real life problems by using computer programming.
- 3.) To make students to understand the art of applying Mathematical techniques to solve some real life problems.
- 4.) To gain knowledge of scientific computing.

**No. of Credits:** 2

**Theory Sessions per week:** 3

**Teaching Hours:** 40 hours

## **Foundation Course**

### **FC-202(2) eGovernance**

#### **Course Introduction:**

Students will be provided with basic awareness of ‘what’, ‘why’ and ‘how’ of e-governance as well as impact of e-government on different stake holders. E-government implementation requires multi-disciplinary approach. Discussion of Case Studies of successful e-governance projects in developing countries will increase understanding of the technical, public administration, economic, managerial perspective of e-government to the students.

#### **Objectives:**

Students would be able to

- 1.) Comprehend the Need and Scope of E-governance.
- 2.) Understand how projects affecting mass and different stakeholders are planned and implemented.

**No. of Credits: 2**

**Theory Sessions per week: 3**

## **Foundation Course** **FC-202(3) Interpersonal Skills**

### **Course Introduction:**

A study related with the interpersonal skill and behavior patterns. The topics include interpersonal communication to problem solving and management with good leadership skills.

### **Objectives:**

The student would be able to:

- 1.) Manage their interpersonal skills and conflicts in an efficient way.
- 2.) Understand leadership skills and maintain team building.
- 3.) Practice time management and solve problem related with it.
- 4.) Solve problems of any issue by resolving conflicts and negotiating.
- 5.) Structure their ethical decision making.
- 6.) Appreciate and respect the culture difference and manage cross cultural differences.

**No. of Credits: 2**

**Theory Sessions per week: 3**

**Elective Course**  
**EC-202(1) History of Gandhian Movement**

**Course Introduction:**

Mahatma Gandhi is the father of the modern India. According to him Truth is God and God is Truth. His life was an experiment with truth and he had strong faith in peace, truth and non-violence. Basic education was his brainchild and its principles were based on his philosophy of life. The course focuses on Gandhiji's childhood, youth and the movement started by him at South Africa and India.

**Objectives:**

The Students would be able to:

- 1.) To know the principles followed by Gandhiji.
- 2.) To understand how he involved in Satyagraha movement.
- 3.) To also know how he dealt with injustice done by the British Government before Independence.
- 4.) To understand the life and works of Gandhiji.

**No. of Credits: 2**

**Theory Sessions per week: 2**

**Teaching Hours: 20**

## **ELECTIVE COURSE**

### **EC-202(2) Introduction to Science and Technology**

#### **Course Introduction**

This course offers an introduction of Science and Technology to students from non-science background. The course will deliver positive and informed values and attitudes towards themselves, others and science and technology.

#### **Objectives**

The student would be able:

- 1.) To develop their knowledge and understanding of the role of science in creating/ changing: the environment, information & communication, life-styles products and services, agriculture, health and nutrition.
- 2.) To understand the impact of technologies people select and use; how these technologies affect other people, the environment and the future
- 3.) To introduce students to the some aspects of science of the future times and how it will affect human kind.

**No. of Credits: 2**

Publisher: Tata Mc Graw Hill

By Jerry Sellers, William Astore,  
Robert Giffen, Wiley Larson

## **Elective Course** **EC-202(3) Introduction to Humanities**

### **Course Introduction:**

This elective course in humanities aims at introducing to the subject of social science, with special emphasis on the issues pertaining to evolution of human society, emergence and various aspects of society in modern India. It also covers issues pertaining to social, political and administrative systems existing in India. The course is framed to familiarize students with the developments in economics, arts and aesthetics and the present day challenges experienced by India and the World societies.

**No. of Credits: 2**

**Theory Sessions per week: 2**

**Teaching Hours: 20 hours**

UNIT	TOPICS / SUBTOPICS
	<b>Human Society And Its Evolution</b>
1	<ul style="list-style-type: none"><li>• <b>World Perspective</b><ul style="list-style-type: none"><li>○ Introduction: Meaning of Society, relevance of human beings in relation to the study of social sciences, Evolution in tools/technology in various ages(Stone Age, Bronze Age and Iron Age), Rise of religions of the world.</li><li>○ Role of nature and its adaptation by human beings through different ages, Evolution of human beings as thinking individuals, Evolution of Knowledge( magical form, Scietific and Religious form), Geographical discoveries and Colonisation.</li><li>○ Emergence of the modern world: Fuedalism, Capitalism, Humanism, Secularism.</li><li>○ Post Renaissance influences-on literature, Architecture,Art, Philosophy and Science.</li><li>○ Industrial Revolution and its influence on the society</li></ul></li><li>• <b>Indian Perspective</b><ul style="list-style-type: none"><li>○ Pre-colonial economy: characteristics pertaining to agriculture, trade and handicrafts industry.</li><li>○ Evolution of colonial rule and its impact on India (Drain theory, De-industrialization), impact on the indian agrararian economy.</li><li>○ Important movements in the Indian History before and after Gandhian Era, Economic developments in the pre and post independence period.</li><li>○ Concepts of secularism, nationalism, internationalism, communalism, regionalism.</li><li>○ Major Challenges: Education, Upholding Democracy, Bueracracy etc.</li></ul></li></ul>

	<b>Social, Political And Administrative Systems</b>
2	<ul style="list-style-type: none"> <li>● <b>Social Structure</b> <ul style="list-style-type: none"> <li>○ Meaning of social structure; concept of ROLE and STATUS, Components of Social structure- Social stratification and Division of labour.</li> <li>○ Social Institutions: Family, Marriage.</li> <li>○ Economic Institutions: Types of economic systems( Hunting and gathering, pastoral and horticultural economy, agrarian economy and industrial economy. Political systems and types of authority which impact the social structure.</li> <li>○ Religion: Positive and Negative aspects of Religion on society.</li> <li>○ Marginalized groups in a society: meaning, Types: orphaned, delinquent, destitute children, Disabled, Women in distress, Commercial sex workers, Scheduled castes, Scheduled tribes, OBCs, Denotified tribes, Minorities. Social Changes and the factors causing them(Biological, geographical, technological,socio-cultural)</li> </ul> </li> <li>● <b>Political systems:</b> (with reference to India) <ul style="list-style-type: none"> <li>○ History, composition and basic features of the Indian Constitution.</li> <li>○ Democracy: meaning, state institutions and the democratic process, role of non-state institutions/groups in the democratic process.</li> </ul> </li> <li>● <b>Administrative Systems</b> <ul style="list-style-type: none"> <li>○ Administrative Structure: Role of The Chief Executives at Union level, state level and district level.</li> <li>○ Composition of line agencies: departments, public corporations and public enterprises, boards and commissions</li> <li>○ Composition of staff agencies: General agencies, technical agencies and auxilliary agencies.</li> <li>○ Important Administrative Processes: Planning, Decision-making, Communication, Control and co-ordination.</li> <li>○ Governance issues and strategies: Characteristics, functions and difference between state and Government.</li> <li>○ Governance: its concept, significance and characteristics, relevance of good governance.</li> </ul> </li> </ul>
3	<b>Economic Development, Development of Arts and Aesthetics</b> <ul style="list-style-type: none"> <li>● <b>Indian Economy</b> <ul style="list-style-type: none"> <li>○ Features, Development and Growth strategies through planning in the post independence period. Performance of the Indian Economy post 1990(economic reforms era) yanmurthi</li> </ul> </li> <li>● <b>Arts and Aesthetics: (with reference to India)</b> <ul style="list-style-type: none"> <li>○ Literature: Introduction to Poetry, fiction, drama, novels, short stories.</li> </ul> </li> </ul>

	<ul style="list-style-type: none"> <li>○ Fine Arts: Introduction to Paintings( pre and post medieval ages, modern era)</li> <li>○ Dance: History and Types of Indian Classical Dances</li> <li>○ Music: History and Types of Indian Music and major indiginous musical instruments.</li> <li>○ Theatre and Indian Cinema: Forms of Theatre in Modern Era, Cinema in modern era and Its impact on the society.</li> </ul>
4	<p><b>Contemporary Concerns and Challanges: (with reference to India for sub points</b></p> <ul style="list-style-type: none"> <li>● <b>Human Security</b> <ul style="list-style-type: none"> <li>○ Valuing human beings as assets/resources, concept of human rights, concept of human security including health, food</li> </ul> </li> <li>● <b>Educaton and Awareness</b> <ul style="list-style-type: none"> <li>○ Aims and importance of education, challenges to education in the modern era.</li> </ul> </li> <li>● <b>Informaiton and Communication Technology</b> <ul style="list-style-type: none"> <li>○ Role of ICT, Socio- economic implications of ICT</li> </ul> </li> <li>● <b>Peace and. Conflict</b> <ul style="list-style-type: none"> <li>○ Challenges to World Peace, Role, functioning and obstacles to Efforts of the UNITED NATION, SAARC,EU,APEF.</li> </ul> </li> <li>● <b>Globilisation</b> <ul style="list-style-type: none"> <li>○ Pros and cons.</li> </ul> </li> <li>● <b>Environment</b> <ul style="list-style-type: none"> <li>○ Environmental initiatives in India and challenges.</li> </ul> </li> </ul>

## **Elective Course** **EC-202(4) Disaster Management**

### **Course Introduction:**

This course aims to provide an insight into immensely significant area of common welfare. The course will enable a student to understand the major types of natural and man-made disasters and also methods of mitigating their ill-effects on the human race. The course also covers a few modern disasters which are hitherto not experienced by humankind across the globe.

### **Course Objective:**

The student would be able

- 1) To understand the concept of managing the Disasters when it occurs.
- 2) To apply their technical knowledge to manage the Disasters.
- 3) To identify the key points and area where and how to use the Information Technology to manage the damage in disasters.
- 4) To get detailed knowledge of various Government agencies and NGOs dealing for disaster management.

**No. of Credits: 2**

**Theory Sessions per week: 2**

**Teaching Hours: 20 hours**

UNIT	TOPICS / SUBTOPICS
	<b>Introduction to Disasters / Hazards</b>
1	<ul style="list-style-type: none"><li>• Definition of disaster:</li><li>• General Effects of disasters</li><li>• Causal Factors</li><li>• Disasters and development (cause and effect)</li><li>• Meaning of Disaster Management</li><li>• Types of Disaster/Hazards:<ul style="list-style-type: none"><li>• Natural</li><li>• Anthropogenic</li><li>• Sociological</li><li>• Technological</li><li>• Transport</li><li>• Climate change</li><li>• Social and Psychological dimensions of disasters</li><li>• Coping with stress, anxiety and fears</li><li>• Technology and disaster management</li><li>• Latest Technological equipment</li><li>• Disaster Response:<ul style="list-style-type: none"><li>• Reasons for concern</li><li>• Objectives</li><li>• Study of responses in Kutch Earth-quake, 2001</li></ul></li></ul></li></ul>

	<b>Disaster Management</b> <ul style="list-style-type: none"> <li>• Definition</li> <li>• Need</li> <li>• Obstacles</li> <li>• Disaster Relief and Factors</li> <li>• International approach to integrated disaster risk management</li> <li>• Risk Mitigation Strategies</li> <li>• Participatory assessment of disaster risk</li> <li>• Disaster Reduction</li> <li>• Communicable diseases occurring after natural disasters</li> <li>• Their prevention</li> <li>• Mass casualty management</li> <li>• Technology and disaster management and latest technological equipment to combat disasters</li> </ul>
2	<b>Relief, Rehabilitation, Recovery and Role of NGO and Government</b> <ul style="list-style-type: none"> <li>• Relief</li> <li>• Rehabilitation</li> <li>• Displacement and Development</li> <li>• Priorities and opportunities in Rehabilitation and reconstruction</li> <li>• Relevance of Mitigation and its techniques</li> <li>• Mitigation measures</li> <li>• People's Participation</li> <li>• Disaster Recovery <ul style="list-style-type: none"> <li>◦ Business continuity planning</li> </ul> </li> <li>• Role of NGO in Managing disasters</li> <li>• India's natural disaster's proneness: <ul style="list-style-type: none"> <li>◦ Management of disasters in India</li> <li>◦ Institutional and policy framework</li> <li>◦ Government Policies for Disaster Planning</li> </ul> </li> </ul>
3	<b>Use of IT in Disaster Management, Applications and Future of Disaster Management</b> <ul style="list-style-type: none"> <li>• <b>Use of IT in Disaster Management:</b> <ul style="list-style-type: none"> <li>◦ Computer Attack</li> <li>◦ Other latest technological Equipments: <ul style="list-style-type: none"> <li>▪ TSUNAMI WARNING SYSTEM</li> <li>▪ CENS (Community Emergency Notification System)</li> <li>▪ CREST (Consolidated Reporting of Earthquakes and Tsunamis)</li> <li>▪ CUBE (Caltech USGS Broadcast of Earthquakes)</li> <li>▪ DART (Deep Ocean Assessment and Reporting of Tsunamis)</li> <li>▪ EAS (Emergency Alert System)</li> <li>▪ EMWIN (Emergency Managers Weather information Network)</li> <li>▪ GPS (Global Positioning System)</li> </ul> </li> </ul> </li> </ul>
